Professional Experience

Aniya Network Solutions Inc. (Canada) Jun 2025 - Present

Full Stack Developer (Remote)

Dream Valley Realty - Real Estate Agent Management Platform

- Architected a comprehensive real estate management system using React.js, Node.js, and MongoDB with role-based dashboards for agents, brokers, and administrators.
- Implemented email/SMS notification services for lead updates, appointment reminders, and agent communications.
- Created analytics dashboards showing lead conversion rates, agent performance KPIs, and campaign effectiveness.

Technologies: Reactjs, Nodejs, Prisma, MySQL, SocketIO, RTK, Tailwind, n8n, Twillo

KPKajan CRM - Lead-to-Client Management System

- Built a full-featured CRM application managing the complete lead lifecycle from initial contact through client conversion.
- Automated email synchronization and AI-powered summarization using n8n, Gmail API, and OpenAI, extracting key information from client emails and updating CRM records automatically.
- Designed intuitive UI for lead tracking, follow-up scheduling, and pipeline visualization using Tailwind CSS.

Technologies: Reactjs, Nodejs, Tailwind, n8n, Mongodb, Mongoose, n8n, OpenAI

AI Automation & Integration Projects:

- Built 12+ voice AI agents using Vapi AI and Retell AI integrated with Twilio Voice/SMS APIs for automated appointment scheduling, lead qualification, and customer service with real-time CRM data synchronization.
- Developed AI video generation pipelines using Blotato, Veo3, and HeyGen to create personalized marketing content at scale for real estate listings, client testimonials, and social media campaigns.
- Designed intuitive UI for lead tracking, follow-up scheduling, and pipeline visualization using Tailwind CSS.

Technologies: N8n, Make.com, Power Automation, Retell AI, Eleven labs, Vapi, Veo3, OpenAi

Classic IT & Sky Mart Ltd Oct 2024 - Jun 2025

Full Stack Developer

PhoneCase BD - E-commerce Customization Platform

- Architected and developed a full-stack custom phone case configurator using Next.js 14 (App Router), Node.js, and MongoDB, enabling real-time product customization and preview.
- Integrated secure payment gateway and order management system with proper error handling and transaction validation.
- Designed RESTful API endpoints with Express.js and Mongoose ORM for efficient data operations.

Technologies: Nextjs, DnD, Nodejs, Mongodb, Mongoose

Gurudoyal Govt. College - Complete Management System (Team Lead)

- Led a team of 3 developers in building a comprehensive college management system using React.js, Node.js, and MongoDB.

- Implemented role-based access control (RBAC) for admin, faculty, and student portals with secure authentication.
- Education Board style admission and Year-to-Year promotion for HSC, Honours, Master's programs with subject choice option.
- Bkash payment integration on admission fee, examination fees.
- Attendance, Class routine, Examination management for Teachers, Administrator and Students.

Technologies: Reactjs, Nodejs, GP sms api, Mongodb, Mongoose, RTK, Bkash

E-commerce Solutions

- Developed a single-vendor e-commerce platform using Next.js with best practices including code splitting, lazy loading, and image optimization.
- Implemented complex filtering, sorting, and pagination for product catalogs handling 1000+ items.
- Integrated state management (Redux Toolkit/Zustand) for cart functionality, user sessions, and wishlist features.

Technologies: Nextjs, DnD, Nodejs, Mongodb, Mongoose

Point of Sale (POS) Application (Team Lead)

- Led development of a desktop/web POS system with 2 developers, handling both frontend UI and backend API development.
- Designed efficient database queries and indexing strategies for fast transaction processing.
- Implemented barcode scanning integration and thermal printer support for seamless checkout operations.

Technologies: React, Nodejs, Tailwind, Pdf, Mongodb, Mongoose, RTK

DuckSocket (Remote Internship)

May 2023 - Oct 2023

Full Stack Developer

Core Responsibilities:

- Developed and maintained production-grade web applications using React.js and Redux Toolkit for centralized state management, ensuring predictable data flow across complex component hierarchies.
- Integrated RESTful APIs with proper async/await error handling, loading states, and error boundaries to ensure smooth user experiences.
- Contributed to the full development lifecycle from requirements gathering to deployment on MERN stack projects (MongoDB, Express.js, React.js, Node.js).

Technologies: HTML, CSS, React, Redux, Nodejs

Technical Skills

Programming Languages: Javascript, TypeScript, Python.
Frontend Technologies: Reactjs, Nextjs, TailwindCSS, Redux, Html5, CSS3, Framer Motion.
Backend Technologies: Nodejs, Expressjs, JWT, Zod, Redis, Nestjs.
Databases & ORM: MongoDB, PostgreSQL, Supabase, Firebase, Mongoose, Prisma.
AI & Automations: N8n, Make.com, Power Automation, Retell AI, Eleven labs, Vapi, Veo3, OpenAi, FollowUpBoss, GoHighLevel.
Familiarities: React Native, React Query, Figma, SocketIO, Jest, AWS, Docker, Git/Github.

Education

Bangladesh University of Business and Technology (BUBT)

B.Sc. in Computer Science Engineering (CSE)
